

# PAVING THE WAY TOWARDS RESILIENT, INCLUSIVE GROWTH IN THE GLOBAL SOUTH - 100% RENEWABLE. 100% ACCESSIBLE.

*Interactive Online Seminar series | 04., 12., 17. November 2020*

The **World Future Council** and **Brot für die Welt** cordially invite you to an interactive online seminar series on developing long-term Renewable Energy strategies for a just and fair transformation towards 100% RE.

## ***What will Planet Earth look like in 2050?***

According to the United Nations 2030 Agenda for Sustainable Development, the new paradigm for governments should be to “leave no one behind” and ensure economic and social prosperity within planetary boundaries. Mitigating the worst impacts of climate change will therefore require the large-scale, rapid deployment of Renewable Energy (RE) and fossil fuels to be left in the ground. A huge transformation towards 100% RE lies ahead of humanity as it faces one of its biggest challenges. To make this transformation a reality, everybody will need to think outside the box: the future cannot be shaped by ideas from the past.

This online seminar series explores the *lessons learned from collaborative efforts in Costa Rica, Tanzania and Bangladesh to develop long-term 100% renewable energy pathways* and lasting policy reform. They will also explore the role renewable energy plays in other key sectors such as cities, agriculture and transport and how a transition towards 100% RE can help decarbonise these sectors and making them more resilient in the future. The three sessions will take place once a week between early and mid-November 2020\*[1].

[1] We will be using Zoom Meeting and all participants' names will be displayed openly. If you wish to be anonymous, please change your name.

## Session 3: Political success – ensuring relevance of 100% RE strategies in the Global South

Achieving 100% RE and initiating lasting policy reforms takes time. Setting up continuous and relevant processes are thus a necessity. This last session on “Political success – ensuring relevance of 100% RE strategies in the Global South” of our online seminar series explores how can political success can be defined and how to ensure other sectors are aware of the potential benefits of a transition towards 100% RE.
